

# OUR SERVICES

Well Installations and Soil Borings

## Customer Service

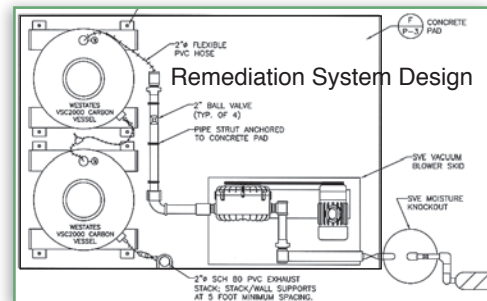

Our staff are approachable and knowledgeable, as we aim to answer all clients' questions and address their specific concerns. We work closely with our clients to develop satisfactory project schedules, and we stick to them.

## Regulatory Liaison

In our many years in the field of environmental cleanup, RRM's senior staff have fostered close relationships with state and local regulators, and can thus offer expert liaison among clients, regulatory authorities and third parties.

## Cost Savings

RRM completes jobs at significant cost savings through our established network of cost-effective vendors and subcontractors, low overhead, and our negotiated limited work scopes.

Our experienced and skilled staff can provide you with a wide range of environmental services, including:

- Phase I & II Environmental Site Assessment
- Soil and Water Quality Assessment
- MtBE Investigation and Cleanup
- Corrective Action Plans
- Hazardous Materials Business Plans
- Remediation System Design and Installation
- Treatment System Operation and Maintenance
- Contaminated Vapor Abatement Systems
- Stormwater Pollution Prevention Plans
- Legal Support and Regulatory Liaison

## Triton Construction Division:

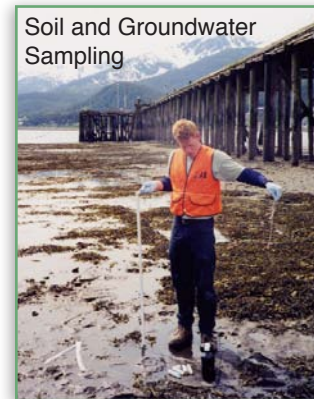

- Fuel Tank Removal and Installation
- Secondary Containment Installation and Testing
- Fueling System Design and Permitting
- Construction Management

Soil Over-Excavation

Remedial System Construction

Soil and Groundwater Sampling

UST Removals
